R-PDL3-SWINGSET1
Two-point fixing

Features and benefits

- Product set based on a mechanical shield anchor and a snap hook
- Very high load capacity thanks to the anchor's unique design
- Suitable for fixing in reinforced concrete floor slabs (tested in cracked concrete)
- The market's only mechanical anchor certified for application in the Teriva* type beam-and-block flooring systems
- National Technical Assessment certified
- Certified for application in solid concrete and hollow masonry units
- Classified as A1 non-combustible
- Set composed of steel elements only (long service life guaranteed)
- Vey easy and quick installation

*For two-point fixing (M8 anchor)

Compatible
with all
hanging chairs
for children
and adults.

Features and benefits

- Universal set compatible with all wooden structures, suitable for square and circular cross-section beams
- High permissible set loading*
- Intended for cocoon-type chairs, hanging ladders and swings for children and adults, garden sofas, climbing walls**
- Lock nut included in the set prevents the joint from becoming loose
- Perfect solution for DIYers
- Zinc-flake coating for extreme corrosion resistance

Zinc-flake coating stands for:

- Long service life
- High corrosion resistance
- Self-regeneration capability

* 120 kg on one-point fixing, 240 kg on two-point fixing
(not including the wooden structure's load capacity)
** Depending on the fixing type (one- or two-point)

Compatible
with all
garden
swings.

Features and benefits

- Perfect solution for installation of swings, hanging chairs, suspended benches, and sports equipment such as punching bags and balls etc.
- Infallible fixing, even in the weakest substrates
- Styrene-free polyester resin based set
- Long service life of vibration resistant joint
- Ready for application with standard caulk guns
- Suitable for application in solid as well as hollow (using mesh sleeve) substrates
- European Technical Assessment certified
- Certified for application in 14 substrate types
- Maximum set loading as high as 240 kg*

* Maximum loading with two fasteners and in selected base materials

Compatible
with all
garden swings,
hanging chairs,
and sports
equipment.
